

# World's Best Cinnamon Rolls Available at Your Business!

## GOURMET HAND-MADE CINNAMON ROLLS WITH CREAM CHEESE ICING

We have been baking our hand-made cinnamon rolls daily since 1993. They are moist and gooey and they DO NOT contain hydrogenated oils, trans-fats, nuts, raisins, bleached flour, eggs, shortening or preservatives.

We insist on the best ingredients money can buy and we settle for nothing less.

Our philosophy is simple; try to produce some of the best products in the world, while minimizing unnecessary fats and sugar. We never use preservatives or hydrogenated fats in anything we make. While this product has less than half the fat of some similar competitor products, you would never know it by its taste. Ingredients like pure vanilla, premium quality *light* cream cheese, the highest quality wheat flours and the finest cinnamon money can buy give us an edge that is tough to beat. When people ask why our cinnamon rolls are so good, we like to say “what we don’t put in them is just as important as the ingredients we do put in them”. We take pride in our products and we hope you will agree with us. We still make every cinnamon roll by hand and we’ve sold millions of them over the years to people from all over the world. If people are willing to travel the world for our cinnamon rolls, imagine what our cinnamon rolls can do for your business.

**NO NUTS NEED APPLY...**
